Lets Write Code   (Lec-3)

① Download & install nodeJs into your system

② open cmd and write node

It will start Read, evaluate, Print loop (REPL) into CMD.

③ Now we can Run any JS in CMD.

④ we can Run JS into Console also.

⑤ Create app. js File in VS Code
to write JS program

app. JS

```
var name = 'Mitheesh';
var a = 10;
var b = 20;
Console. log (name);
Console. log (a+b);
```

Terminal
```
node app. JS        ← Cmd to RUN JS
Mitheesh
30
```

Things to Know →

Like we have window object in Browser
Console, we have a global object in
NodeJS which gives us access to
global functions such as Set timeout
Set interval.
